

## 3 Automations Every Service Business Needs

---

### 01 Inquiry to Onboarding on Autopilot

From first contact to signed contract – your onboarding runs itself.

// HOW IT WORKS

1. Prospect submits your inquiry or contact form
2. Instant auto-reply confirms receipt and sets expectations
3. Automated email sends with your calendar link or next steps
4. Once booked, contract and welcome email fire automatically

### 02 Ghost-Lead Follow-Up Sequence

Most deals are lost to silence, not rejection. Automate the follow-up.

// HOW IT WORKS

1. You send a proposal or quote
2. 48hrs later: automated check-in – friendly, no pressure
3. Day 5: a gentle nudge with a clear next step
4. Day 10: a final 'closing the loop' message – then it ends gracefully

### 03 Client Check-In Messages

Proactive communication = happier clients and more referrals.

// HOW IT WORKS

1. Project start date triggers the automation
2. Mid-project: automated check-in asking how things are going
3. Project end: wrap-up message with next steps or offboarding info
4. Follow-up review request sends a few days after completion
