

3 Automations Every Trades Business Needs

01 Lead Follow-Up Texts Within 5 Minutes

Whoever responds first gets the job. This automation makes sure that's always you.

// HOW IT WORKS

1. New lead submits your contact form or inquiry
2. Automation triggers instantly – sends a personalized text to their number
3. Text confirms you got their message and sets expectations for next steps
4. You follow up manually when ready – but they already know you're on it

02 Estimate Reminder Sequences

Stop chasing quotes manually. Let the automation follow up so you don't have to.

// HOW IT WORKS

1. You send an estimate as normal
2. If no response in 24hrs, an automatic reminder goes out
3. If still no response, a second nudge goes out at 72hrs
4. Lead responds or the sequence ends – either way, no awkward manual follow-up

03 Review Requests After Every Job

Most happy customers won't leave a review unless you ask at exactly the right moment.

// HOW IT WORKS

1. Job is marked complete in your system (Jobber, HouseCallPro, etc.)
2. 24hrs later, an automated text goes to the customer
3. Text includes a direct link to your Google review page
4. 5-star reviews accumulate without you lifting a finger
