

3 Automations Any Business Can Start With

01 Instant Inquiry Auto-Responses

Every inquiry deserves an immediate reply – even at 11pm on a Sunday.

// HOW IT WORKS

1. Someone submits your contact form, emails you, or DMs you
2. An auto-reply fires within seconds acknowledging their message
3. Reply sounds human – sets expectations for when they'll hear back
4. You respond properly when ready – they're already warm and reassured

02 Canned Responses for Repeat Emails

If you're writing the same email twice a week, that's an automation.

// HOW IT WORKS

1. Identify your 3-5 most commonly sent emails
2. Write a template for each with variable fields (name, date, etc.)
3. Set up triggers – a tag, label, or keyword fires the right template
4. Review and send in seconds instead of writing from scratch every time

03 Weekly Task Reminders

Get recurring tasks out of your head and into a system that never forgets.

// HOW IT WORKS

1. List every task you do on a weekly or recurring basis
2. Set each one up as an automated reminder in Notion, n8n, or Zapier
3. Every Monday (or your chosen day) a digest lands in your inbox or Slack
4. Nothing falls through the cracks, even on your busiest weeks
